

Abortions on Irish residents 2000 – 2022

Abortions were declining between 2002 and 2018 due to the work of voluntary counselling agencies some of who received government grants. No pro-life agency gets grants anymore unless it agrees to arrange or refer for abortions. The core of our Government has no respect for the rights of conscience or Christian morality.

Exclusive of Irish resident's abortions in England, the following (Including a few non-residents) have taken place in Ireland at Irish taxpayers expense.
